To Whom It May Concern:

August 27, 2014

My name is Nathan Dhamers I am the Director of Technology Services, Glenbard Township District 87.

I would like to share a few words about our relationship with the Team at Wireless Training & Solutions (WiTS). The WiTS team came highly recommended by one of our most trusted industry partners and we soon found out why. The WiTS team was able to quickly adapt to our environment and identify issues that we had not previously considered; such as local police and emergency services causing channels to drop from radar interference as well as placement of school microwave ovens. The WiTS senior engineer provided a wealth of knowledge, my staff was thoroughly impressed with his technical knowledge and ability to simplify and explain each of the Wi-Fi concepts. I have already recommended the WiTS team to three other school districts, I feel they bring the knowledge and expertise required to manage our complex education environments. Running many different wireless devices simultaneously can be very challenging, WiTS provided the results we were looking for and has saved us time and money in the process; giving us the confidence to move forward knowing that we have the infrastructure and support in place to handle all of our wireless needs. I look forward to continuing our relationship with the WiTS team and would highly recommend their Professional Services to any organization looking for top tier Wi-Fi services and support.

Sincerely,

Nathan A. Dhamers
Director of Technology Services
Glenbard Township District 87
